#### **SUBJECT: Engine Application DVD Sets, September 2013**

While preparing for the production of the September Engine Application 3-disc DVD sets, it became clear that the disc space required for the Engine Application support material had exceeded the capacity of the three DVD's.

To avoid the need to expand to four discs, the decision was made to omit the 3D (STEP) files and 2D (DXF) files for the 2.4L, 3.0L, 8.1L and 12.5L engines from the September 2013 DVD set.

These files were available in the June 2013 DVD set. For future reference (via DVD) please refer to your June 2013 Engine Application DVD set.

These files will continue to be available on the Portal
